JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

XXI. *An Account of the Degree of Cold observed in Bedfordshire: By John Howard, Esq; F. R. S. in a Letter to John Canton, M. A. F. R. S.*

S I R,

Read April 12, 1764. **I** Would beg leave to acquaint you of a degree of cold that I observed at Cardington, in Bedfordshire, the 22d of November last: just before Sun rise Farenheit's scale by one of Bird's thermometers being so low as 10 and $\frac{1}{2}$. If it will throw any light on the locality of cold, or think it worth the Society's observation, would leave to your better judgment, and remain with great esteem,

S I R,

Your most obedient servant,

John Howard.
